Powalite+ User Manual
LED CAMPING LIGHT V2.0
With Passive Infrared Sensor

CE RoHS

Powalite+ LED Camping Light

 Thank you for choosing our LED products! Please read the manual before using and use the light right according to manual.

Product Features :

- 1 With passive infrared sensor, turning on/off automatically according to human activity at night.
- 2 White light and red light.
- 3 Built-in magnets, sticking to metal.
- 4 Hook on ends, hanging anywhere.

Packing List

| | |
|-------------|----|
| Light | x1 |
| USB cable | x1 |
| Metal sheet | x1 |
| Manual | x1 |
| Lanyards | x2 |

— 01

Appearance:

A Built-in magnet
 B Power indicator
 C Built-in photodiode
 D Passive Infrared Sensor
 E Hook
 F Switch
 G Charging Port
 H USB dust plug

Operation Instruction:

1. The light has 2 levels white light and 2 levels red light. The third level of white and red light is PIR mode (Passive Infrared Sensor).
2. It turns to the first level white light by pressing shortly or for long time when it is off.
3. Pressing for long time will switch off the light at any mode.
4. Lighting Modes:
White light: low – high – PIR Mode – low – high...
Red light: low – high – PIR Mode – low – high...
5. Double press will change color of light when it is on and it will turn to the first low brightness mode.
6. PIR Mode: When the light flashes 4 times, then continuously keeps lighting around 10 seconds, it shows the light enters PIR mode which only works on dark surrounding. It will automatically light up when human walking around and will be off and enter sleeping mode if no human around. Under this mode, it only works when PIR detector turns to human.
7. Charging indicator flash 1.5 times per second.
8. Charging indicator will keep flashing when charging and it turns red on when the light is full charged.
9. Charging and Running Time:
Charging time: 4-5 hours
It will keep working about 7 hours at high brightness mode after full charged.

★Above data are tested at laboratory. Actual running time will be in difference for difference of individual product components and environmental temperature influence on lithium battery.
